Rainbow Lorikeet

What has the lorikeet come to tell us? Is it a message from the spirit world, connecting us to our spiritual nature and reminding us of our link with all living things?

Or has it come to remind us of our connection to family. These birds' mate for life and are often seen in pairs or small groups symbolising family and community.

As individuals, we printed our own feathers using symbols and marks that resonated with us. These feathers were then cut out many times in many colours and then as a community we began to build our lorikeet.
